Regular Letters

Detection of hydrothermal plumes on the northern Mid-Atlantic Ridge: results from optical measurements
C.S. Chin, G.P. Klinkhammer and C. Wilson 1

The influences of surface temperature on upwellings in planetary convection with phase transitions
V. Steinbach and D.A. Yuen 15

Hydrothermal anorthitization of plagioclase within the magmatic/hydrothermal transition at mid-ocean ridges: examples from deep sheeted dikes (Hole 504B, Costa Rica Rift) and a sheeted dike root zone (Oman ophiolite)
D.A. Vanko and C. Laverne 27

Melting experiments on homogeneous mixtures of peridotite and basalt: application to the genesis of ocean island basalts
T. Kogiso, K. Hirose and E. Takahashi 45

Origin of the Columbia River basalts: melting model of a heterogeneous plume head
E. Takahahshi, K. Nakajima and T.L. Wright 63

Gravity evidence of very thin crust at the Gakkel Ridge (Arctic Ocean)
B.J. Coakley and J.R. Cochran 81

Controls on the locus of intraplate deformation in central Australia
M. Sandiford and M. Hand 97

Origin of particulate organic carbon in the upper St. Lawrence: isotopic constraints
J.A.C. Barth, J. Veizer and B. Mayer 111

Low-^{18}O silicic magmas: why are they so rare?
S.D. Balsley and R.T. Gregory 123

Systematics of U-series nuclides in primitive lavas from the 1730–36 eruption on Lanzarote, Canary Islands, and implications for the role of garnet pyroxenites during oceanic basalt formations
O. Sigmarsson, S. Carn and J.C. Carracedo 137

The thermal response of a metamorphic belt to extension: constraints from laser Ar data on metamorphic micas
D. Vance, M. Ayres, S. Kelley and N. Harris 153

Evidence for microbial activity at the glass-alteration interface in oceanic basalts
T. Torsvik, H. Furnes, K. Muehlenbachs, I.H. Thorseth and O. Tumyr 165

Discovery of microscopic evidence for shock metamorphism at the Serpent Mound structure, south-central Ohio: confirmation of an origin by impact
R.W. Carlton, C. Koeberl, M.T. Baranoski and G.A. Schumacher 177
